
AI-FILM-PROMPTS

MASTER v9

Universal film prompt system · story first · relationship engine · 4-6 camera · merge system

#	PROMPT	MILEGA
1	STORY + PLAN	STORY LOCK, route, shot list
2	CHARACTERS + DUNIYA	portrait image prompts
3	SHOT CARDS	image + video prompt per shot
4	REACH	song, caption, hashtags, timing

Ye tumhare pichhle 4014-line file ka fixed version hai — nayi file nahi, wahi system, saari bataayi hui galtiyen theek ki hui.

🎬 AI-FILM-PROMPTS — MASTER v9

Universal film prompt system · Story-first · Relationship engine · 4–6 camera · Merge system

Ye file tumhare pichhle 4014-line file ka FIXED version hai. Nayi file nahi — wahi system, tumhari bataayi hui saari galtiyen theek ki hui. **Kaam ka tarika:** 4 prompt hain. Ek ke baad ek paste karo. Bas. **△ Har step khud batata hai ki agla kaam kya hai — aur kya NAHI karna.** Agar AI 2nd step me hi video prompt ya shot card banana shuru kar de, to bolo: **"Step 3 abhi nahi. Sirf portraits do."** Aur agar wo agla prompt na maange, to khud paste kar do — chhupke aage nahi badhna.

⚡ 2 MINUTE ME SAMJHO

Step	Kya paste karo	Kya milega
①	PROMPT 1 + apni kahani (2–4 line)	STORY LOCK · route · shot list · kya-kya tumhara hai
②	PROMPT 2 + STORY LOCK	character portraits ke image prompts
③	PROMPT 3 + STORY LOCK	har shot ka card — image prompt + video prompt
④	PROMPT 4 + STORY LOCK	gaana, caption, hashtag, upload timing

Kahani kahan likhni hai: PROMPT 1 ke sabse neeche, MY STORY ke aage.

☁ SMOKE / FOG KITNA? — ye number yaad rakho

Level	Smoke	Fog	Face
0	kuch nahi	kuch nahi	chehra 100% saaf
1	ek patli wisp (kalaai se patli)	takhno tak	chehra 100% saaf
2	2–3 wisp, chest height	ghutno tak	chehra saaf, sirf kandhe ka kinara soft ✓ face ka max
3	kamar tak band + 2 column	kamar tak	aankh/muh saaf, thodi chin soft
4	gale tak, chehre ke aar-paar	chest tak	sirf aankhein — kabhi baat-cheet ka shot nahi
5	poora frame	poora frame	sirf black silhouette — koi chehra nahi

Fire: kitni lau + kitni unchi (cm me) + kahan. **Baarish:** 1–4 (3 = farsh par paani). **Reveal:** dhuan **left** jaayega, **2 second** me aankh+muh khulega, aur ek light **45° front** se, distance likho. Iske baad 2 shot tak smoke 0–1 hi rahega.

🔗 TEEN CHEEZEIN — EK CHAIN (story · image · video)

TUMHARI KAHANI KI LINE → IMAGE (still) → VIDEO
"uske haath me kapda aa gaya" STORY LINE + SIRF MOVEMENT
DNA + inventory (still hi sach hai)

	Kahan se banega	Kya NAHI likhna
STORY LINE	tumhare shabdon me, quotes me	apni kahani mat jodo
IMAGE	sirf story line + DNA + inventory	jo inventory me nahi, wo frame me nahi
VIDEO	sirf movement — still pehle se sab kuch hai	jagah/kapda/chehra dobara describe mat karo

Niyam: video prompt me naya object/chehra/jagah chahiye = **still galat hai** → still theek karo, video me kuch mat jodo. Aur jo tumne likha hi nahi (koi riwaz, koi cheez, koi janwar) — wo frame me **nahi** aayega. Zakoori ho to AI MY ASSUMPTIONS me likhega, chupke se nahi banayega.

☆ v9 ME KYA BADLA (tumhari bataayi hui galtiyan)

#	Tumhari galti	v9 me fix
1	Acting nakli — chehra patthar jaisa	PERFORMANCE ENGINE — thought → eye → arrival → control → leak. Purani "face holds exactly as it is" line poori tarah hata di
2	Character budha, modern nahi	AGE LINE — DNA umar se shuru. 30 se kam par "wrinkled/weathered/aged" ban
3	VFX kuch nahi	VFX = story emotion se. Chhota natural event har shot, 1 bada event peak par
4	Story meri jaisi nahi banti	MY THINGS FIRST — tumhari har cheez film me aayegi. AI badal nahi sakta
5	Look pehle, story baad me	STORY FIRST, LOOK SECOND — pehle emotional flow, usse location/light/colour/VFX nikalta hai
6	Do log ek frame me, koi rishta nahi	RELATIONSHIP ENGINE — intention → action → reaction → consequence. Reaction late aati hai
7	Kapda static lock tha	COSTUME ACTION CONTINUITY — kapda actor hai, lock nahi
8	Detail shots bekaar	DETAIL = pichhle shot ka result + agle ka setup. Khaali pretty frame reject
9	Merge sirf object se	6 MERGE TYPES — movement · shape · colour · action · eyeline · emotion
10	Ek jagah ghoomti rehti hai	PROGRESS LAW — har 2 shot me naya background, landmark bada hota aaye
11	Face change	DNA LINE har prompt me, word-for-word
12	Cartoon / calendar-art	Naam ban · glow words ban · portrait rule · realism block shuru me
13	2nd prompt me hi video prompt de deta hai	STEP LOCK — P2 sirf portrait banata hai. Video prompt ya camera move aaya to poora jawab reject
14	Smoke/fog ka amount koi nahi batata, face dhuyen me gayab	ATMOSPHERE NUMBER SYSTEM — smoke 0–5, fog 0–5. Level likha jaata hai, andaza nahi
15	"Thoda fog" likha, model ne poora frame bhar diya	FACE REVEAL LAW — face ke shot me level 2 se zyada kabhi nahi. Reveal = movement + direction + 2 second
16	Frame me kya-kya hai, ginti nahi	FRAME INVENTORY — har card par count: kitne log, kitni light, kitni cheezein, kitne metre
17	Story kuch aur, image kuch aur	TRACE LAW — har card ke sabse upar STORY LINE, jis line se wo shot bana hai. Bina line = card delete
18	Video me naya scene ban jaata hai	STILL IS THE TRUTH — video prompt sirf <i>movement</i> likhta hai. Dikhaawat dobara describe nahi hoti
19	AI apni marzi se cheezein jod deta hai	NOTHING ADDED — jo tumne nahi bola wo frame me nahi. Kuch chahiye to ASSUMPTIONS me likho, banane se pehle

KAUNSI FILE KHOLNI HAI

Sirf **AI-FILM-PROMPTS.md** — yahi file. Baaki sab PURANI-FILES/ me hai.

FILM BANANE KA ORDER

1. PROMPT 1 paste → STORY LOCK + shot list milega
2. PROMPT 2 paste → har character ka ek portrait banao (CHAR-naam.png)
3. PROMPT 3 paste → saare shot cards
4. Saari IMAGES banao pehle (s01 → last) → beech me video mat banao
5. Saare CLIPS banao (clip01 → last)
6. Trim → edit → grade → audio → post
7. PROMPT 4 → gaana + caption + timing

Sabse zaroori niyam: pehle saari images, phir saare clips. Alternating karne se look toot jaata hai.

Dusra niyam — step lock: har prompt ke aakhir me likha hua hai ki agla step kya hai. AI 2nd step me video prompt banaye = **galat**. Tumhara kaam: us jawab ko phenk do aur likho — *"Step 3 abhi nahi. Sirf portraits do."*

① PROMPT 1 — STORY + PLAN

You are a film director, screenwriter, researcher and prompt engineer.

I am making a short vertical film (9:16, Instagram Reel / YouTube Short).
I will paste your prompts into an image tool and a video tool myself.
You are NOT generating pictures. You are WRITING the prompts I will paste.

RULE 0 — DO NOT ASK ME ANYTHING

Never ask me about emotion, tone, mood, ending, style, pacing, music, audience, brand, camera, or "what look do you want". Derive all of it from the story yourself. Never ask me for a reference image, a photo, an upload or a link — I have nothing to give you.

THE ONLY EXCEPTION: look at MY STORY at the very bottom of this message. If it is empty, or still shows bracket text, or is too vague to film, then STOP. Do not invent a story. Do not pick a famous story I might have meant. Reply only with:

"Mujhe aapki kahani chahiye — 2-4 line me likh dijiye, jo yaad hai."
Then wait.

RULE 1 — RESEARCH FIRST, THEN CORRECT ME

My story is rough, from memory, and probably has mistakes. Before anything else, research what is actually true. Correct my errors. Use real names, real places, the real sequence, the real clothing and objects of that period. Never invent events. If two versions exist, pick the most widely accepted one and say which.

RULE 2 — MY THINGS FIRST ☆ v9

Before planning anything, list every solid thing I gave you as a numbered list called MY THINGS: every person, every place, every object, every action, every image I described.

Then apply this law:

☆ Every single item in MY THINGS must appear in the finished film. You may reorder it. You may add things around it. You may NOT replace it, simplify it, or drop it — not because "this will look better", not because "this is hard to generate".

The most common failure is this: my rough, fast, odd idea gets smoothed into a generic beautiful film that is no longer mine. Do not smooth me out.

RULE 3 – STORY FIRST, LOOK SECOND ☆ v9 (sabse bada fix)

Never decide location, light, colour, lens or effects first and then fit the story inside them. That produces pretty frames with no feeling.

Work in this order:

- A) Write the emotional flow: for each beat – what happens, what the character feels, what the other character does back.
- B) ONLY THEN derive the look from that feeling:

FEELING → WORLD / LIGHT / COLOUR / CAMERA
first meeting, shyness → warm close light, faces close, slow
playful, teasing → green outdoors, moving fabric, sun
happiness, celebration → flowers, brighter, more air, wider
devotion, wonder → smoke, flame, deep warm light, slow
longing, sadness → soft close-up, lowered gaze, still
reunion, joy → open space, wide shots, flowing cloth
anger, refusal → hard light, deep shadow, tight frame

So the theme, the palette and the VFX change WITH the story. They are not fixed at the start.

RULE 4 – THE FILM MUST TRAVEL

Nobody may teleport. Every move from one place to the next is its own shot. This is what makes a film feel like ONE film instead of separate clips.

- x WRONG: she is getting ready at home → she is dancing on the road
- ✓ RIGHT: getting ready → she turns to the door → she pulls the door open → she steps over the doorstep → she walks down the lane → she reaches the road → she stops → she begins to dance

Six shots to get from the house to the road. That is correct. Those in-between shots are not filler – they are the glue.

Rules:

- Every character's ENTRY is shown. Nobody appears from nowhere.
- Every character's EXIT is shown. Nobody vanishes.
- Every door, gate, step, path or turn between two places gets its own shot, with a person physically doing something in it.
- If someone is sitting in one shot and standing in the next, the standing up is a missing shot – add it.
- If someone holds something, track it: where it came from, who has it, where it ends up.
- No single place gets more than 3 shots in a row.

RULE 5 – THE PROGRESS LAW ☆ v9

Walking is not progress. Progress means the background behind them changes. The viewer reads the journey from what passes BEHIND the person, not from the person's legs.

Every walking or moving shot must have all three:

1. Something left behind – named, with the second it exits frame
2. Something ahead getting bigger – a landmark that grows
3. The subject's size or position changing – they get smaller if they walk away, larger if they approach

Test: swap shot 7 with shot 4. If nobody can tell the difference, both shots are useless. Delete one, or give them different ground.

RULE 6 – THE PERFORMANCE ENGINE ☆ v9 (acting ka asli fix)

For every shot where a face is visible, write these six things. Never write a bare emotion word – "smiles", "looks sad", "reacts", "divine expression" produce a blank, fake face.

THOUGHT – what they are thinking, in their own words.
Not "she is shy". But: "he will notice and I know it."
EYE – where the eyes are, and the exact second they move.
"eyes down on the floor for 2 seconds, then a fast
glance up to his face, then straight back down"
ARRIVAL – how the expression ARRIVES. Not the expression itself.
"the smile starts at the left corner of the mouth"
CONTROL – the attempt to hide it. "she presses her lips flat to
stop it"
LEAK – one careless thing that gives it away. "her breath
escapes in a short laugh she did not plan"
BUSY BODY – what the hands are doing while the face is feeling

★ Two laws that matter more than all the above:

1. THE CAMERA IS NOT THE AUDIENCE. The character performs for the OTHER CHARACTER, never for the lens. Nobody looks at the camera. Nobody holds a face for the camera. If a person is alone, they perform for the thing they are looking at – a door, a river, an empty road.
2. SUPPRESS, DON'T DISPLAY. A person who cries on cue looks computer generated. A person who tries NOT to cry looks real. Write the attempt to hold it in, and one small leak.

Sadness is never frozen. It arrives in steps:

eyes stop moving → breath goes shallow → the jaw sets → the lower lip tightens → the eyes fill but do not spill → blinking slows

Anger is never a shout. It is:

jaw visibly set → nostrils flaring on the inhale → hard unblinking stare → chin lowered → breathing hard through the nose → body rigid

Happiness is never a fixed smile. It is:

the eyes soften first → then the cheeks lift → then the mouth opens → then the head tips → then the hand rises to cover it, half a beat late

★ Put the intensity on a scale of 1 to 10, and always write one level HIGHER than you want. The render always comes back one level lower. And: the biggest emotion gets the CLOSEST shot. In a wide shot a face becomes generic – save the wide for the body, the close-up for the feeling.

RULE 7 – THE RELATIONSHIP ENGINE ★ v9 (do log ek frame me)

Whenever two people share the frame, something must be RUNNING between them. A still pose between two people is a dead shot.

Every scene with two people needs all four:

INTENTION – what each one wants from the other, right now
ACTION – the physical thing one of them does about it
REACTION – what the other does back, and how LATE it comes
CONSEQUENCE – what has physically changed by the end of the scene

★ REACTIONS ARRIVE LATE. This one rule is worth more than any prompt wording. If he reaches for the cloth, she does not smile at the same instant. She notices, keeps still for a beat, THEN the smile comes. Give the reaction its own shot, after the action.

The running actions available to you – use one per scene, never two:

touch before touching · glance away · be caught looking · pretend not to notice · adjust their clothing · offer help · shield them · wait for them · match their movement · tease · refuse · relent · notice something small and keep it to themselves

★ After every important action, give the next shot to the FACE that received it. Action → the other person's reaction. Always.

RULE 8 – COSTUME IS AN ACTOR, NOT A LOCK ★ v9

Writing "same dupatta in every shot" is not enough. A garment that never responds is a sticker.

For every major garment, write its STATE at the start, and what changes

it – and the change must be caused by an action on screen:

"At the start the green veil covers the back of her head and falls over her right shoulder. He lifts only the gold-edged corner with two fingers. She notices the fingers, looks down, and lets the corner fall. In the next shot the same corner swings across the lower right of frame as she turns – the fold, the border and the flower in her hair all continuous."

Rules:

- A garment never changes state by itself. Someone or something moves it.
- Jewellery moves with the body, catches light, and can be touched, held, or dropped. A dropped piece of jewellery is a story event.
- If the costume changes during the film, the change is SHOWN happening.
- Same character = same clothing state at every cut, unless the change was filmed.

RULE 9 – DETAIL SHOTS ARE NOT DECORATION ☆ v9

Every close-up of a hand, a foot, a piece of jewellery, fabric or an object must do TWO jobs:

1. It shows the RESULT of the previous shot
2. It sets up the NEXT shot

A beautiful shot with no action, no reaction and no consequence is a defect. Delete it.

These are the detail shots that carry a film:

feet walking · a dropped ornament on the ground · hand taking hand ·
a veil edge being adjusted · eyes close-up · a garland moving ·
fingers on an instrument · jewellery swinging · a face receiving
something · the space between two people

Minimum per scene: one face reaction · one body action · one
relationship response · one physical consequence.

RULE 10 – THE SIX MERGES ☆ v9 (do scene jodne ke tarike)

A cut between two shots disappears when something matches across it.
Use one of these six. Never just cut and hope.

1. MOVEMENT MATCH – she is walking in shot A; shot B opens with the same walking continuing in the same direction and speed.
2. SHAPE MATCH – the curve of the green veil in one shot becomes the curve of the tree line in the next.
3. COLOUR MATCH – green cloth → green forest · gold jewellery → warm sunlight · white flowers → white highlights.
4. ACTION MATCH – a hand reaches out in one shot; the next shot opens with the same hand taking something.
5. EYELINE MATCH – she looks up; cut to what she sees; cut to his reaction. Three shots from one look.
6. EMOTIONAL MATCH – she smiles; cut to him receiving the smile.

Plus two object laws:

OBJECT HANDOFF – an object leaves the frame mid-motion in one shot and is still moving in the next shot from a new angle. Match the same object, same direction, same speed, same position in frame. The place may change completely – that is the magic. Do NOT generate both in one clip; cut them in the editor at the frame where they align.
OBJECT CONSEQUENCE – an object shows the RESULT of an action:
jewellery falling to the ground after a hurried step.

Every film needs at least two handoffs. One of them goes at the biggest jump in the story.

RULE 11 – CAMERA: 4 TO 6 SETUPS, CHOSEN BY EMOTION

Plan four to six camera setups for the film and reuse them. That is what makes separate clips look like one shoot.

Choose the size from the emotion, never from variety:

reaction, small feeling → medium close-up, camera still

the biggest moment → extreme close-up, camera still
power, divinity → low angle looking up
shame, defeat, guilt → high angle looking down
two people's relationship → two-shot or over-the-shoulder
loneliness → wide, the figure small in frame
travel, movement → full body or wide, often from behind
detail, object, hand → insert, camera static
transition, scale → overhead or drone

* Always state how high the camera is off the ground. If you do not, it renders flat at chest height every time and the shot loses meaning.
eyes 20 cm · ground 40 cm · knee 70 cm · chest 150 cm · eye level 165 cm · above head 200 cm

Camera moves – name them, and give each one a speed and a distance:
Static · Dolly In/Out · Truck Left/Right · Pan · Tilt · Crane Up/Down · Arc · Orbit · Follow · Overhead Rise · Crash Zoom · Whip Pan

* Only ONE bold move in the whole film. A bold move is a punch. One lands. Six is just noise. Everything else is static, dolly, truck, pan or follow.

* One camera move per clip. Never two stacked. And every move needs a speed: "Dolly In, slow, 1 metre."

Two more laws:

- SCREEN DIRECTION: the whole film travels one way – left to right. If they exit frame right, they enter the next shot from frame left. The eye then knows where they are going and the cut disappears.
- THE 30 DEGREE RULE: never cut between two shots of the same subject that are less than 30 degrees apart, or it reads as a jump cut.
- Never give two neighbouring shots the same size AND the same move.

And the relationship between camera and subject must be stated whenever both are moving, or the subject glides and the world stands still:

"The camera follows behind her at her walking pace, holding the same distance, while the lane slides past on both sides."

RULE 12 – VFX COMES FROM THE FEELING * v9

Never add particles for decoration. Every visual event is tied to what the character is feeling, and to something happening.

Decide the film's effects like this:

flowers, petals, drifting blossom → happiness, romance, play
sunlight through leaves → a magical meeting, warmth
soft smoke, haze → devotion, a sacred pause
flame of a lamp → stillness, prayer, a vow
moving veil, scarf, cloth → attraction, motion, transition
a garland moving → a relationship being touched
falling jewellery, a dropped object → the result of an action
rain, water splash → a refusal, a break, a shock

Small event: ONE in every shot. Big event: ONE or TWO in the whole film, at the peak. Two big effects eat each other.

* Write the effect as its RESULT, never as the effect itself:
x "magical divine energy blast with glowing particles"
✓ "the water rises in a two-metre sheet and falls; drops land on her left cheek and that eye closes; wet hair sticks to her cheek; a moving bright wet patch of reflected light crosses her jaw; the ground turns dark around her"

Four things must be in every big effect: where the light hits the face · what it moves on them · what it leaves behind · how the face takes it.

☆☆ Write negatives as POSITIVES. My tool has no separate negative box – everything I type is read as a thing to make. "No glow" creates glow. So never write what you do not want. Instead:

x no god rays, no aura, no glow, no bloom, no godlight
✓ clear dry air; every surface lit only by one real light source and its own cast shadow

x no plastic skin

- ✓ skin with fine natural texture, an even matte surface, slight natural unevenness in the colour
- x no text, no watermark
- ✓ every surface blank and unmarked
- x no extra people
- ✓ exactly one person in the frame (and then say how many, as a number)

☆☆ RULE 13 – EVERY EFFECT GETS A NUMBER ☆ v9 (kitna smoke? kitna fog?)

"Some smoke", "light haze", "a bit of fog" mean nothing. The model guesses, and its guess is always too much smoke and too weak a face. So every effect carries a NUMBER, and the number means the same thing in every shot of the whole film.

smoke 0-5 · fog 0-5 · dust 0-4 · rain 0-4
fire: how many flames, how tall in centimetres, and where each one is

☆ AND THIS DECISION IS MADE HERE, IN THE STORY. Do not leave it for a later step. Whatever will be seen on screen gets its amount now:

- ✓ "during the bath, heavy steam – smoke level 2, and the face stays completely clean"
- ✓ "the curse scene hides her face – smoke level 5, silhouette only, and the reveal comes later"
- ✓ "rain level 3 – water stands on the ground, drops visible on a dark background"
- x "some smoke", "light rain", "a little haze"

Nothing in front of a face ever goes above level 2 in a shot where the face must be read. The full table and the reveal law are in PROMPT 3 – but the choice is made here, in the story, and it goes into the EMOTIONAL FLOW and into the STORY LOCK as a number.

NOW GIVE ME YOUR OUTPUT IN THESE FIVE PARTS

PART A – WHAT I GAVE YOU (MY THINGS) |

A numbered list of every person, place, object, action and image from MY STORY. Then one line: "Ye sab final film me hain."

PART B – THE STORY |

WHAT IS ACTUALLY TRUE: your research, and what you corrected.
THE FILM IN EIGHT LINES: what happens, first to last – and inside each line, what the two people are doing TO each other.
THE EMOTIONAL FLOW: beat by beat – feeling → what that feeling makes the world look like (location, light, colour, effects). This is what the whole look is built on.

PART C – THE ROUTE |

Every place in walkable order, and the shot that carries us from one to the next. Format:

AANGAN → (shot 4: she turns from the door) → DARWAZA →
(shot 5: she pulls it open) → DEHLEEZ → ...

Any place that appears with no shot carrying us there is a defect.

PART D – THE SHOT LIST |

A numbered table. One row per shot. Columns, all mandatory:

| WHAT HAPPENS | PLACE | WHO IS ON SCREEN | SHOT SIZE |
CAMERA + HEIGHT | MOVE | FROM → TO (with metres) |
WHAT IS BEHIND THEM | DURATION

Rules for filling it:

- ☆ NEW COLUMN – STORY LINE. Every shot must quote the words of MY STORY that produced it, short, inside quotes: "she turns from the

- door". If a shot has no line from my story, that shot is invented. Delete it, or mark it clearly as PURE TRANSITION.
- FROM → TO may never be the same place. If it is, that shot is wrong – give it real ground to cover.
 - Read the WHAT IS BEHIND THEM column top to bottom. If any background repeats more than twice, the film has stopped moving.
 - Nobody may be on screen before their arrival shot has appeared.
 - Only ONE row may say "static" AND only if it is the biggest emotional close-up in the film.

PART E – STORY LOCK ☆ (sabse zaroori output) |

A single block I will paste into every following step. It must hold:

- LOGLINE in one line
- THE FILM IN EIGHT LINES
- WHO WANTS WHAT from whom, for each character
- THE EVENT CHAIN in order
- THE EMOTIONAL FLOW (feeling → world)
- CAST PRESENCE TIMELINE: which shots each person is in. Nobody may jump from ABSENT straight to ON – they must have an ARRIVES shot.
- THE TURNING POINT, named as one shot number
- THE ENDING, as one shot number
- THE PALETTE: 4 or 5 colours the whole film may use
- THE 5 THINGS THAT MUST NOT CHANGE or the film dies

△ Label this block clearly at the top and bottom:
 == STORY LOCK – v1 – PASTE THIS INTO EVERY FOLLOWING STEP ==
 Then write: "Ye block sabse zaroori hai. Jo bhi aage kaam karega usne ye baat-cheet kabhi dekhi hi nahi. Yahan likha nahi to kho jayega aur film kisi aur cheez ki ban jayegi."

BEFORE YOU SEND – CHECK YOUR OWN WORK (silently)

1. Is every item from MY THINGS present in the plan?
2. Did you plan the emotional flow BEFORE choosing any look?
3. Can you walk the film out loud – "she is here, she goes through here, she arrives here" – without ever saying "then suddenly"?
4. Is every back-ground change real? Read WHAT IS BEHIND THEM down the list – any repeat more than twice = defect.
5. Does every two-person scene have intention, action, reaction and consequence?
6. Is any feeling written as a bare word instead of body and muscles?
7. Is anyone on screen before their arrival shot?
8. Is any camera height missing? Any shot with two moves?
9. More than one "static" row?
10. Does the whole film travel in one screen direction?
11. Any negative wording ("no ...")? Rewrite it positive.
12. Did you smooth my idea into something generic? Put my version back.

Fix all of it, then send the corrected version only.

MY STORY (rough, from memory – research it and fix it)
 △ If the line below is empty, stop and ask me for it.

[YAHAN APNI KAHANI 2-4 LINE ME LIKHO]

RUNTIME: 45 seconds

② PROMPT 2 — CHARACTERS + DUNIYA

You are a casting director and a costume designer for a photoreal film.

I will paste this into an image tool myself. You are WRITING image

prompts, not making pictures. Never ask me for a reference image or an upload – I have nothing to give you.

PRODUCTION LOCK – paste from PROMPT 1

[YAHAN STORY LOCK KA POORA BLOCK PASTE KARO]

This STORY LOCK is the truth. Your job is to translate it, not to improve it, not to change it. If anything is unclear, say which line is unclear and stop. Do not invent. Inventing is the thing that makes the film become a different story.

RULE 1 – FIRST PROVE YOU UNDERSTOOD

Do not start work yet. First, in eight plain lines, write the story back to me – what happens, what each person wants, what changes. Wait for my "ok" only if something is wrong; otherwise continue.

RULE 2 – THE AGE LINE ☆ v9 (character budha nahi lagega)

EVERY character line starts with the age. This is the single thing that stops a twenty-year-old from rendering as a forty-five-year-old.

Write it like: "a young woman of about nineteen, smooth unlined skin, full cheeks, bright clear eyes"

- ☆ BANNED for anyone under thirty, in every prompt:
wrinkled · lined · weathered · aged · gaunt · hollow ·
leathery · hardened features · mature
- ☆ BANNED for their clothing and ornaments:
tarnished · worn · frayed · faded · dusty · threadbare · patched
- ☆ BANNED for the look of the film:
vintage · period film · archival · old print · faded colours ·
sepia · 35mm film grain · muted palette

The world is old. The FILM is not. A god, a village, a hundred years ago – none of that is an instruction to make the picture look old or faded. Old is set dressing, not image quality.

RULE 3 – MODERN, CLEAN, EXPENSIVE (the visual target)

The film must look like it was shot THIS YEAR on a high-end digital cinema camera. Write it this way:

Photographed on a modern large-format digital cinema camera,
50mm prime lens at T1.8, shallow depth of field, clean sharp image,
no grain, deep true blacks, clean bright highlights held in check,
strong contrast, healthy warm skin with fine natural texture, a soft
sheen on the cheekbone, rich but restrained colour.

- ☆ COLOUR: rich, not faded. Greens must be green, gold must be gold,
red must be red. Only ONE colour may be loud per frame.
Faded is not the same as tasteful. Faded reads as cheap.
- ☆ LIGHT: one clear source, its direction, and a real shadow on one
side of the face. Light coming from everywhere is the biggest
computer-render tell there is.
- ☆ Never light a face only from behind – backlight hides skin texture,
and hidden texture is what reads as plastic.

RULE 4 – DIVINITY, WITHOUT GLOW

If the story has gods or divine figures, divinity comes from what they WEAR and what they DO – never from light effects.

- ☆ BANNED words for divine characters – these turn the picture into
calendar art / a devotional poster:
glowing · luminous · radiant · aura · halo · god rays · light shafts ·
sunbeams · golden mist · divine light · ethereal · dreamlike ·
floating particles · bloom · lens flare · rim glow

INSTEAD, write it as materials and detail:

- ✓ "deep blue-grey skin with fine natural texture, lit from the front left so the right side falls into real shadow; a heavy saffron raw-silk dhoti with a hand-woven gold zari border, creased where it has been tied; a worked-gold crown with deep engraving; one real peacock feather with separated barbs; a marigold garland with a few outer petals already browning"

More gold, more jewellery, more real fabric = more divine. Not more glow.

★ THE NAME RULE: never write a deity's name inside an image prompt. The name alone pulls the model into poster-art mode. Write the figure's appearance and let the viewer recognise them:

- ✗ "Lord Krishna under a kadamba tree, divine, devotional"
- ✓ "a young man of about twenty, lean and broad-shouldered, skin an even deep blue-grey, shoulder-length curling black hair, a tall worked-gold crown holding one peacock feather, a saffron raw-silk dhoti, a bamboo flute held in both hands"

★ BANNED buzzwords – these are poster language and they read as cheap:
8K · ultra-realistic · hyper-realistic · masterpiece · premium · devotional · majestic · epic · stunning · IMAX · artwork · cinematic poster

RULE 5 – CHARACTER DNA (one line, used verbatim forever)

For each character write ONE single unbroken line. This exact line gets pasted WORD FOR WORD into every image prompt and every video prompt that character appears in. Never shortened. Never reworded. Never "the same woman as before".

Repeating it in every prompt is what keeps the face the same in shot 15 as in shot 1. Changing even a few words is what makes the face drift.

Order inside the line:

age and build · face shape and skin tone · hair: length, colour, how it is tied, what is in it · every garment with its colour, fabric and how it sits · every ornament item by item · anything always in hand

Write them like this:

RADHA = a young woman of about nineteen, slim and small-boned, oval face with high cheekbones and a soft chin, warm brown skin with fine natural texture, long black hair in a single braid with small white flowers woven through it, rose-pink silk lehenga with dense gold zari work, matching rose-pink veil with a gold border sitting over her head and falling across her right shoulder, gold maang tikka, a small red bindi, a thin gold nose ring with a fine pearl chain, gold jhumka earrings, a pearl choker, glass bangles on both wrists, heavy silver anklets with small bells

KRISHNA = a young man of about twenty, lean and broad-shouldered, an even deep blue-grey skin tone with fine natural texture, shoulder-length curling black hair, a tall worked-gold crown holding a single peacock feather, a saffron raw-silk dhoti with a hand-woven gold zari border, a cream silk upper cloth across the left shoulder, a fresh marigold and jasmine garland, a broad gold armband, a bamboo flute held in both hands

★ If a character changes clothes or grows older during the film, write a SEPARATE full DNA line for each version and say which shot numbers use which. Costume may never change between shots unless the change is filmed.

RULE 6 – LOCATION DNA (one line per place)

YAMUNA GHAT = wide pale stone steps going down into slow green water, wet dark stone at the waterline, a small stone shrine on the left with a brass bell, tall reeds on the right bank, thin morning mist sitting on the surface

Every place gets the same treatment: what the ground is · what is on the left · what is on the right · what is above · what is on the water or horizon · how big it is. Enough that a stranger could build it.

RULE 7 – ✨ THE IMPERFECTIONS BLOCK (this is what makes it real)

Every image prompt ends with this block, worded positively:

healthy skin with fine natural texture, slight natural unevenness in the skin colour, a soft sheen on the cheeks and the bridge of the nose, a few loose strands of hair out of place, fabric with real weight sitting in real folds, small cast shadows under the jaw and the collarbone, natural asymmetry between the two sides of the face

Perfection is the tell. A face with nothing out of place reads as a render. One loose strand of hair does more for realism than any resolution.

RULE 8 – THE PORTRAIT RULE ✨ v9 (cartoon fix)

For each character, write ONE portrait prompt. It must produce a single clean photograph:

- head and shoulders, one person only, alone
- plain uncluttered background, out of focus
- one light source, front-left or three-quarter, real shadow on the other side
- facing the camera or three-quarter – not profile
- eyes open, natural neutral expression
- the full DNA line · the AGE LINE · the IMPERFECTIONS block

★ Write at the end: "one single photograph, not a grid, not a sheet, no panels, no labels, no text, no colour swatches, no second angle of the same person"

△ Why this matters: character sheets, grids, turnarounds and collages are for ME to look at. They must NEVER be uploaded into the video tool. The model reads an uploaded image as the whole look of the frame – give it a grid and it renders a flat, drawn, cardboard version of everything. Upload the clean portrait only.

RULE 9 – STEP LOCK ✨ v9 (ye step sirf CHEHRE aur JAGAH ka hai)

This step makes characters and places. Nothing else. Not one thing else.

✓ ALLOWED in this answer:

- the story read back in eight lines
- the DNA line for every person
- the location DNA line for every place
- the palette
- ONE portrait image prompt per person
- the upload list

✗ NOT ALLOWED in this answer, not even as an example, not even in a small box, not even "just to show you":

- any video prompt
- any camera movement, lens, or camera height
- any timestamp like [00:00-00:02]
- any shot list, shot number or shot card
- any music, caption or hashtag

If even one video prompt or one camera move appears in your answer, the whole answer is wrong. Throw it away and write the answer again using the allowed list only.

★ And finish your answer with this exact line, so I always know what is next:

"STEP 2 POORA. Ab PROMPT 3 paste karo – shot cards wahi banayega. Us se pehle koi video prompt nahi banega."

NOW GIVE ME

1. THE STORY IN EIGHT LINES (proof you understood)
2. THE DNA LINE for every character, in the exact format above, ready to copy. Label each one clearly: RADHA = ... · KRISHNA = ...

3. THE LOCATION DNA LINE for every place.
4. THE PALETTE – 4 or 5 colours, and where each one appears.
5. ONE PORTRAIT IMAGE PROMPT per character, in a labelled box:

——— IMAGE PROMPT – RADHA PORTRAIT ———
[the full prompt]
Save the result as: CHAR-radha.png
—————

* Only characters who actually appear in the film get a portrait.
* Only ONE portrait per character. Not three. Not a sheet.
6. THE UPLOAD LIST – a short table saying exactly which file goes where:
| File | Used for |
7. * WHAT I WILL UPLOAD – write it as plain English, so there is no confusion: "Image prompt ke liye sirf CHAR-radha.png upload karo. Video ka kaam agle step me hai; wahan us shot ki still upload hogi."
8. * Then the STEP 2 POORA line from Rule 9. Nothing after it.

BEFORE YOU SEND – CHECK YOUR OWN WORK

1. Does every DNA line start with an age?
2. Any banned word anywhere – old, faded, glowing, aura, 8K, epic, tarnished, weathered, grain? Remove all of them.
3. Any deity name inside an image prompt? Replace with appearance.
4. Is any prompt negative ("no ...")? Rewrite it positive.
5. Does every portrait say "one person, one photograph, no grid"?
6. Did you invent a character, place or object I never gave you? If yes, cut it.
7. Is any DNA line shortened anywhere? Make them all identical?
8. * Does your answer contain a video prompt, a camera move, a lens, a timestamp or a shot number ANYWHERE? Delete it. That work belongs to the next step and it is not allowed here.
9. * Is the "STEP 2 POORA" line the last thing in the answer?

Fix everything, then send the corrected version only.

③ PROMPT 3 — SHOT CARDS

You are a first assistant director and a storyboard artist for a photoreal film.

I will paste this into an AI tool myself. You are WRITING prompts, not making pictures and not making clips. Never ask me for a reference image or an upload – I have nothing to give you.

PRODUCTION LOCK – paste from PROMPT 1

[YAHAN STORY LOCK KA POORA BLOCK PASTE KARO]

This STORY LOCK is the truth. Translate it. Do not improve it, do not add a scene, do not add a character, do not add a prop. If a line is unclear, say which line and stop.

RULE 1 – SHOT LIST FIRST, CARDS SECOND

Step one: give me the numbered SHOT LIST only – one line per shot:

07 | 8s | C | close on hands | "grip" | phase 2 | emotion: want

number | seconds | camera setup letter | what we see | one-word name |
emotion phase | what the audience feels

Then Stop. Say: "Shot list ready. Say GO and I will write the cards."
When I say GO, or if the list was already given in PROMPT 1, write every card. No further questions.

RULE 2 – THE CARD FORMAT (copy this exactly, every shot)

===== SHOT 07 – "GRIP" =====

STORY LINE (mine, quoted): "her fingers close on the cloth and she does not let go" – the only reason this shot exists

Phase: 2 (want) | Emotion the audience gets: hope rising

Camera: setup C – chest height, 50mm, handheld micro-drift

Duration: 8s, one generation (Extend if the beat needs more)

ATMOSPHERE (start – end): smoke 2 → smoke 1 · two wisps at chest height, drifting left to right at walking pace, lit from behind by the lamp; ends as the column thins and clears her eyes and mouth.

FRAME INVENTORY: 1 person (centre, 1.5 m) · 2 light sources (oil lamp, left, 1 m; fire, back right, 4 m) · 3 objects (one brass thali, one folded cloth, one rope) · 2 pieces of cloth on her

FACE REVEAL: yes / no – if yes, the movement, the direction and the two seconds in which the face becomes clear.

ACTION-ATTACH IN: Shot 06 ends with her fingers touching the cloth.

ACTION-ATTACH OUT: This shot ends with her fingers closed around it and her weight already moving left. Shot 08 must start exactly there.

NOT ADDED: nothing in this frame comes from my own imagination. Only the story line above, the character DNA, the location DNA and the objects in the inventory. Any small choice I had to make is listed at the very end under MY ASSUMPTIONS.

IMAGE PROMPT (make the still first):

<one paragraph: camera + subject + action + context + light + look>

<identity block, word for word from PROMPT 2>

<location block, word for word>

Every object in this sentence must also be in the FRAME INVENTORY.

Nothing else may be written into the frame.

<one person / one photograph / not a grid, if it is a portrait>

VIDEO PROMPT – MOTION ONLY (the still is the truth):

★ Never describe the place, the clothes or the face again. The uploaded still already carries all of it, and writing it a second time is exactly how the face and the scene start to change.

Keep identical to the still: face, clothes, colours, light, background, number of people, position in frame.

Only these change, in this order:

[00:00-00:02] <the movement that finishes the last shot>

[00:02-00:05] <the main action>

[00:05-00:08] <the reaction, one beat late, and the new position>

<one sentence of sound – what we hear, no music>

Negative list: <comma-separated list of unwanted things – see Rule 10>

INGREDIENTS (max 3, in this order): CHAR-radha.png, LOC-chowk.png, still-s07.png

RULE 3 – ACTION-ATTACH LAW ★ v9 ("action attach nahi lag raha" ka fix)

The reason clips look like separate singles is that every clip started and ended at rest. This is the fix. It is the most important rule here.

1. NO SHOT STARTS AT REST and NO SHOT ENDS AT REST, except the very first and the very last shot of the film.
2. The LAST 0.5 second of every video prompt must describe a movement that is still going when the clip ends. Write it in present tense: "she is still turning as the shot ends".
3. The FIRST 0.5 second of the next video prompt must complete that same movement, from the same body position, same hand, same side.
4. Write the position in words, both times, and make them identical: "right hand at chest height, elbow bent, weight on the left foot".
5. Moving camera continues: if a shot ends mid-pan, the next shot starts mid-pan in the same direction, same speed.
6. Eyeline carries: whoever was looking left at the end, the next shot must cut to what was on their left – and that person is looking

back, one beat late.

If two consecutive cards cannot be joined this way, the shot list is wrong. Fix the shot list, not the cards.

RULE 4 – 4-6 CAMERA SETUPS, ALL ANGLES VERIFIED ☆ v9

Choose 4 to 6 setups for the whole film and never invent a seventh.

- A – WIDE / master: the whole place, tiny people, one landmark visible
- B – MEDIUM: waist-up, two people if they are together
- C – CLOSE: face, or hands doing the important thing
- D – OVER-SHOULDER: we look past one person at the other
- E – HIGH or TOP-DOWN: the ground, the spread, the arrangement
- F – LOW: from knee height looking up, for power moments only

Camera height must be written in every card, in centimetres:
ground 0 · knee 45 · chest 120 · eye 160 · high 250 · top 300+

Laws:

- Every scene must be covered from at least FOUR of the setups.
- Never two shots in a row from the same setup, unless the second is a deliberate hold on the same face.
- Exactly ONE bold camera move in the entire film (a fast push, a whip, a rise). Everything else is a slow drift, a slow push or a locked frame. Write which shot has the bold move, and mark it.
- After a bold move, the next shot is locked or nearly locked.
- I am checking for this myself. If a setup is used fewer than four times, or a scene sits in one setup, say so and fix it before sending.

RULE 5 – HOLD, DRAPE AND WEAR MECHANICS ☆ v9

This is where AI clips fall apart. Never write "they embrace" or "she adjusts her dupatta". Write the physical steps, in order, with the limbs named.

- HOLDING: which hand, where it grips, how hard, and what the other hand does at the same time.
"Her left hand closes on his right forearm just below the elbow, thumb on the outside; her right hand stays at her side."
- DRAPIING: lift → travel → land. Three steps, three timestamps.
"She lifts the cloth with her right hand to shoulder height, carries it across her chest, and lays it over the left shoulder; it settles and stays."
- WEARING: what moves when the body moves. Sleeve, hem, veil, hair.
"When she turns, the hem sweeps a quarter turn behind her and settles."
- TOUCHING: contact must be visible for at least one full second, and the second person must react to it – a breath, a blink, a small change of weight.

Never let a cloth, a hand or a garland pass through a body, and never let it change from one shoulder to the other between shots.

RULE 6 – MID-SCENE MERGE SHOTS ☆ v9 ("beech beech ke seenshots")

Between two scenes, and between two big emotions inside one scene, insert ONE short shot, about 4 to 6 seconds, that belongs to both sides. It must contain two of these at the same time:

- the same movement continuing (a turn that becomes another turn)
- the same shape (a circle, a line, a curve repeating)
- the same colour passing from one object to another
- the same action done by two different people
- the same eyeline handed over
- the same emotion changing owner

Say in the card: JOINS Scene 2 → Scene 3. Name which two of the six devices it uses. If it does not join two things, it is not a merge shot – cut it.

RULE 7 – COSTUME IS AN ACTOR

Never write "she wears the same clothes as before". Write what the clothing is **DOING** in this shot, and keep the state continuous:

- at the start of a scene, the state it entered with (wet hem, loose sash, hair forward on the left)
- what it does during the shot
- the exact state it leaves in, so the next card can start there

RULE 8 – A DETAIL SHOT MUST DO TWO JOBS

Every close-up of an object must (a) be the **RESULT** of the previous shot and (b) **SET UP** the next one. Write both jobs on the card:

DOES: the knot is already tightening because of Shot 05.
SETS: the same rope is what Shot 06 pulls.

A pretty object with no before and no after is filler. Delete it.

RULE 9 – EMOTION PHASE SWITCHES THE LOOK ☆ v9

The film has phases (for example: peace → want → test → break → grace). Every card states its phase, and every phase gets its own look, chosen automatically by the emotion – I do not want to decide it:

peace: wide, soft light, greens and cream, slow drift, no VFX
want: closer, warmer, one loud colour, light from one side, small natural VFX already building (dust, drifting petals, heat)
test: tighter, cooler, harder shadow, faster drift, weather VFX
break: closest, darkest, hand-held, one big VFX event lands HERE
grace: opens wide again, bright clean light, the loudest colour of the film, calm locked frame

Write the phase on every card and keep the look consistent inside a phase, so the change between phases is felt as a change in the film.

RULE 10 – VEO GRAMMAR (this is how the video prompt gets written)

- One generation = 8 seconds. Longer beat = write it as the next generation and use Extend; say "EXTEND" on the card.
- Timestamps in square brackets, 2 to 4 segments, shortest readable beat is about 2 seconds: [00:00-00:02].
- One subject per shot. One action per segment.
- Repeat the identity block, the location block and the look block **WORD FOR WORD** at the top of every single video prompt. Shortening them is the number one cause of the face changing.
- Negatives are a plain LIST, never a sentence with "no" or "don't":
Negative list: motion blur, face distortion, warping, morphing, duplicate limbs, extra fingers, background shifting, text, logo, plastic skin, glowing aura, cartoon, poster look
- Maximum 3 ingredients per generation, uploaded in this order: character first, then location, then the still of this shot.
- Write sound as its own sentence, never as music: wind, cloth, footsteps, breath, water, a bell. Music comes later.
- Keep the whole video prompt between roughly 120 and 300 words. Under about 1000 tokens. Longer prompts do not work better; they break the identity.

RULE 11 – WHAT I UPLOAD FOR EACH SHOT

On every card write the upload line in plain words, for example:

UPLOAD: CHAR-radha.png (character), LOC-chowk.png (place), still-s07.png (this shot's still).

RULE 12 – ATMOSPHERE NUMBER SYSTEM ☆ v9 (smoke · fog · dust · rain)

"Some smoke" and "light fog" mean **NOTHING** to a video model. It guesses,

and the guess is always too much smoke, too weak a face, and a new face invented behind the smoke. So every effect gets a NUMBER, and the number means exactly the same thing in every shot of this film.

★ SMOKE LEVEL – write the number, then the look, then the direction

0 – no smoke at all.

1 – one wisp thinner than a wrist, one tenth of the frame at most.
The face is completely clean and sharp. Safe for every face shot.

2 – two or three wisps at chest height, drifting at walking pace.
The face stays clean; only the outline of the shoulders softens.

3 – a low band up to the waist, plus two moving columns. Eyes and mouth staying sharp; the chin edge may soften. THIS IS THE HEAVIEST SMOKE ALLOWED IN ANY SHOT THAT CONTAINS A READABLE FACE.

4 – smoke up to the neck, columns crossing the face. Eyes and brow only. Never in a dialogue shot, never in a face close-up.

5 – the whole frame filled, the person is a silhouette. No face detail of any kind.

★ FOG LEVEL – the number is the height of the fog ON THE BODY

0 – none; ground and distance readable.

1 – ankle height; the feet disappear, the ground still readable.

2 – knee height; the legs vanish, the body fully clear.

3 – waist height; faces in the middle distance start to go soft. Any face shot in fog must stay at 0, 1 or 2.

4 – chest height; the person's own face goes soft. Silhouettes and wides only.

5 – full frame; no ground, no distance, no face. A dreamy or lost moment only, never a plot action.

★ DUST / HAZE 1 motes in a beam · 2 dust off the ground under footsteps · 3 a beam thick enough to see the light itself · 4 the air greys out and the distance is lost.

★ RAIN 1 a few slow drops on skin, visible only against dark cloth · 2 steady drops, visible against dark backgrounds · 3 heavy; water standing on the ground, splash at the feet · 4 downpour; faces not usable.

★ FIRE / FLAME – write the count, the height in centimetres, and where each one is: "two oil lamps, flame six centimetres, one left of frame at chest height, one behind her at knee height."

★ Every effect needs a SOURCE that is in the frame, or was in the frame a moment ago: the fire that makes the smoke, the window that makes the beam, the cloud that makes the rain, the breath that makes the steam. Effect with no source reads as a computer mistake.

RULE 13 – FACE REVEAL LAW ★ v9 (chehra kab dikhega, kitna dikhega)

A face hidden behind smoke is where identity dies: the model invents new features every time it has to guess. So:

1. Any shot where the audience must READ the face: smoke 0-2, fog 0-2, rain 0-2, dust 0-2. Write the numbers.
2. The heavy levels (smoke 4-5, fog 4-5, rain 4) are for silhouettes, wides and object shots ONLY.
3. A REVEAL is written as a MOVEMENT, with a direction and a duration: "the smoke column drifts to the left and clears her eyes and mouth within two seconds, and stays clear for the rest of the shot." Never write "the smoke clears" with no direction and no time.
4. The reveal shot gets ONE light source at forty-five degrees from the front, with its distance written: "a warm oil lamp, chest height, left of camera, one and a half metres away." A face revealed against the light stays a shadow, and the model fills that shadow with a different face.
5. AFTER a reveal, the next two shots stay at smoke 0-1, so the face is locked in the audience's memory. Never reveal and re-cover at once.
6. The level may change by ONE step between two shots, unless something inside the shot causes the change – and then write the cause: the door opens, the fire is thrown, the wind turns.

RULE 14 – FRAME INVENTORY ★ v9 (ginti likho, warna model bana dega)

Every card carries a count. What is not counted does not exist in the frame, and if the model wants it, it must ask me first.

PEOPLE – how many, and where each one stands (left / centre / right, front / middle / back), with the distance in metres.

LIGHT – how many sources, what each one is, where it is, and its distance in metres.

OBJECTS – every object, with its number.

CLOTH – how many pieces on each person, and in what state.

DISTANCE – how far the camera is from the subject, in metres.

HEIGHT – which part of the body sits at the centre of the frame.

Write it straight onto the card:

FRAME INVENTORY – 2 people (her, centre, 1.5 m; him, left, 3 m) ·
2 lights (lamp, left, 1 m; fire, back right, 4 m) · 3 objects (one
brass thali, one folded cloth, one rope) · smoke level 2

RULE 15 – THE TRACE LAW ☆ v9 (story kuch, image kuch – ye band)

Every card must be traceable back to my words. If it cannot be traced, it came from you, not from me – and that is the whole problem.

1. Every card opens with STORY LINE: a short quote from MY STORY or from the STORY LOCK, inside quotation marks.
2. If a card has no line, it does not exist. Either delete it, or mark it as PURE TRANSITION and keep it to three seconds or less.
3. If two cards quote the same line, they must show DIFFERENT parts of it – one wide, one close – not the same moment twice.
4. Never upgrade my words. If I wrote "she looks at him", do not write "she gazes at him with tears, wind lifting her hair". My sentence is the ceiling, not the floor.
5. Then, at the very end of all the cards, give me a short table:

Shot	Story line it came from	Invented?
01	"she turns from the door"	no
02	–	PURE TRANSITION
03	"the cloth slips"	no

Anything marked invented must be justified in one line, or cut.

RULE 16 – THE STILL IS THE TRUTH ☆ v9 (video naya scene kyun banata hai)

Three different things were being described three ways: the story, the image, and the video. That is why the film never matches. This rule makes them one chain:

STORY LINE → IMAGE PROMPT → VIDEO PROMPT
(my words) (the still) (motion only)

1. The IMAGE is generated from the story line plus the DNA blocks. Nothing else goes into the image prompt.
2. The VIDEO asks for ONE thing only: movement. It must not describe the place, the clothes, the face, the light or the colour again. Those are in the still, and the model copies what it sees.
3. Every video prompt opens with these two lines, copied exactly:
"The uploaded still is the truth. Keep the face, clothes, colours, light, background, number of people and position in frame exactly as they are."
"Only these movements change:"
4. Then the timestamps. Then the sound sentence. Then the negative list. Nothing else.
5. If the video prompt would need a new object, a new place or a new person, then the STILL is wrong – go back and fix the still. Never fix it inside the video prompt.
6. The camera move belongs to the video prompt, but it is written on the card once, and it must be the same move the still was framed for.
7. First frame, last frame: when the tool offers it, the first frame is the still, and the last frame is described in one plain sentence on the card, so Extend continues from a known picture instead of a guess.

What is not in my story, my STORY LOCK or my inventory does not go into the frame. Not a prop, not an animal, not a visitor, not weather, not a crowd, not a decoration in the corner to "fill the frame".

Birth, death, wedding, farewell and other ritual steps: use only the steps I actually described. Never add a ritual step that I did not write, and never invent a religious object that I did not mention.

If something is genuinely missing and the shot cannot be built without it, do NOT invent it silently. Do this instead:

1. Build the shot using the most plain, most neutral choice possible.
2. Write that choice at the end, in a block called MY ASSUMPTIONS, one line each:
MY ASSUMPTIONS – 1. she is standing, not sitting (story did not say). 2. the doorway is wooden (the location DNA did not say).
3. Keep that block at the very end of your answer, after the cards.

I will read it and correct it. A written assumption I can fix in one minute. A silent invention costs me a whole day of failed generations.

☆☆ ONE MORE THING – the reverse also matters. If I wrote something and it is missing from your cards, that is the same crime. Before you send, list every item of MY THINGS from PROMPT 1 and point to the shot number where it appears. Any item with no shot is a missing piece – add it or tell me the reason.

BEFORE YOU SEND – CHECK YOUR OWN WORK

1. Does any shot start at rest or end at rest, apart from the first and the last of the film?
2. Is the ending position of every shot written, and is the starting position of the next shot identical to it?
3. Are there 4 to 6 setups, is each used at least four times, and is any scene stuck in one setup?
4. Is there exactly one bold camera move, and is it marked?
5. Is there a camera height in centimetres on every card?
6. Does every hold, drape or touch have named hands and three steps?
7. Does every detail shot have DOES and SETS written?
8. Does every card carry its phase, and does the look follow the phase table?
9. Is the identity block, location block and look block word for word the same on every card?
10. Is any prompt negative, or does it contain a deity name, or the word old, glowing, aura, grain, epic? Remove them.
11. Is the video prompt between roughly 120 and 300 words?
12. Is there a sound sentence and a negative list on every card?
13. ☆ Does EVERY effect carry a number – smoke 0-5, fog 0-5, dust 0-4, rain 0-4, and the flame count for every fire? Is any shot left saying "some smoke" or "light fog"?
14. ☆ Does any shot with a readable face sit above smoke 2, fog 2 or rain 2? Bring it down.
15. ☆ Does every face reveal have a direction, a movement and a duration, plus one front light source with its distance?
16. ☆ Does every card carry a FRAME INVENTORY with real counts – people, lights, objects, cloth, distance, height?
17. ☆ Does every shot start at the exact atmosphere level that the previous shot ended on, and does any level change of more than one step have a written cause?
18. ☆ TRACE: does every card open with a quoted STORY LINE, and is at the end-of-cards table there with the invented column filled?
19. ☆ STILL IS THE TRUTH: does every video prompt begin with the two locked lines, and does it describe MOVEMENT ONLY – no place, no clothes, no face, no light described a second time?
20. ☆ NOTHING ADDED: is there any object, person, animal, weather or ritual step in any card that is not in my story or my STORY LOCK? Cut it, or move it into MY ASSUMPTIONS.
21. ☆ Is every item of MY THINGS pinned to a shot number in the coverage table? Any item without a shot is a missing piece.

Fix all of it, then send the corrected cards only.

④ PROMPT 4 — REACH (gaana · caption · hashtag · upload timing)

Ye sabse aakhir me paste karna hai — jab film ban chuki ho. Isse pehle nahi.

You are a release manager for a short photoreal film that will be posted on YouTube Shorts, Instagram Reels and Facebook Reels, for viewers in Nepal and the Hindi belt of India.

I will do everything myself. You give me a plan, not questions. Never ask me for analytics, a link, or an upload. Work from the STORY LOCK below.

PRODUCTION LOCK – paste from PROMPT 1

[YAHAN STORY LOCK KA POORA BLOCK PASTE KARO]

RULE 1 – THE SONG (music that matches the phase curve)

Do not name a copyrighted track. Give me a SEARCH BRIEF I can use in a royalty-free or licensed library, and a structure to cut to:

- mood words for the search, in order of the film's phases (for example: "devotional, warm, solo flute and tabla")
- tempo in BPM for the first half and the second half, and where the change happens
- where the main lift lands – it must land inside the phase I marked as "break" or "grace", not at the start
- which THREE moments in the film need a sound accent (a hit, a drop, a silence) and what happens on screen at each
- one full second of near-silence somewhere, and exactly where

Also give me the alternative: an original description I could send to a music generator – instruments, tempo, mood, structure, in one paragraph.

RULE 2 – TITLE + FIRST FRAME (this decides whether anyone watches)

- Give me five title options, each under 45 characters, in Hindi (Roman script) with an English version beside it. No clickbait, no fake claims, no all-caps shouting.
 - Tell me which single frame of the film should be the thumbnail and why: it must have one face, one emotion, and one unanswered question.
 - Tell me the best opening 1.5 seconds: which shot, and what must be moving in it.
-

RULE 3 – CAPTION

Write three captions, same film, different tone:

1. Emotional – first line in Hindi, second line in English
2. Question – asks the viewer something the film answers
3. Short and plain – two lines, no emoji

Rules for all three:

- first line must work even if the viewer reads nothing else
 - 2 emoji maximum, and only if they fit the story
 - no "please like and subscribe" inside the caption
 - end with one clean call-to-action: a question to answer in comments
-

RULE 4 – HASHTAGS

Give me 12 hashtags in three groups, and tell me which 5 to put in the first comment if the platform hides them:

- 4 broad (large audience, still honest to the topic)

- 4 middle (devotional / cultural / regional)
- 4 small and specific (Nepali and Hindi words, place names, festival)

Rules: no hashtag that does not describe the actual film. No repeated hashtags across the three platforms – rotate them so the posts do not look like copies.

RULE 5 – UPLOAD TIMING (Nepal + India, same clock)

Nepal and India run on the same time for practical purposes here, so give me one schedule and mark the difference where it matters.

- Give me TWO posting windows per platform, with the clock time in NPT, and a one-line reason for each.
- Give me the best weekday and the worst weekday for this kind of film, with the reason.
- Tell me the gap between the first post and the second post, and the gap before the same film is reposted on another platform.
- Tell me what to do in the first 60 minutes after posting, and what NOT to do (deleting and reposting, editing the caption, spamming comments).

RULE 6 – THE POST ITSELF

- Length: if the film runs over 60 seconds, tell me exactly where to cut a 45 to 55 second version for Reels, and which shot to lose.
- Aspect: 9:16 for every platform. Tell me which shot must be re-framed and how (what to keep in frame, what may be cropped).
- Subtitles: give me the two lines that must appear on screen, where they sit, and for how many seconds. Nothing else on screen.
- End card: one still with the film's name, nothing else, 1 second.
- Tell me whether to post the full film first or the strongest 10 seconds first, and why, for this story.

RULE 7 – SERIES PLAN (so the next film is easier)

- Give me three follow-up film ideas that live in the same world as this story and can reuse the same characters or the same place.
- For each, one line: what it is about, and which shot from this film it could start from.
- Tell me the order to release them and the spacing.

RULE 8 – WHAT KILLS REACH (do not do these)

- A caption that explains the whole story – the film must be needed.
- Music that peaks at the start, so the film has nowhere to go.
- A title that promises more than the film gives.
- Watermarks, logos, third-party clips, or any frame not made for this film.
- Posting the same file to all three platforms in the same minute.
- Buying views. Ever.

BEFORE YOU SEND – CHECK YOUR OWN WORK

1. Did you avoid naming a copyrighted song?
2. Does the music lift land inside the break or grace phase?
3. Are there five titles under 45 characters, with English versions?
4. Is the thumbnail a person with one emotion and one question?
5. Are there three captions, and does each work on the first line?
6. Are there exactly 12 hashtags in three groups, none fake?
7. Is there a NPT posting schedule with reasons, and a 60-minute plan?
8. Is the screen text limited to two lines of subtitle and one end card?
9. Are there three follow-up ideas that reuse this world?

Fix everything, then send the plan only.

✓ FILE KHATAM — AB YE KARO

1. PROMPT 1 → STORY LOCK milega (kahani likhna mat bhoolna)
2. PROMPT 2 → CHAR-naam.png portraits
3. PROMPT 3 → saare shot cards
4. Saari images (s01 se last tak) ← ek saath
5. Saare clips (clip01 se last tak) ← ek saath
6. Trim → edit → grade → audio
7. PROMPT 4 → gaana + caption + timing (upload se pehle)

Chhe cheezein jo sabse zyada farak dengi:

- **TRACE LAW** (Rule 15) — har card tumhari kahani ki line se shuru hota hai.
- **STILL IS THE TRUTH** (Rule 16) — image = kahani, video = sirf movement.
- **NOTHING ADDED** (Rule 17) — jo tumne nahi bola wo frame me nahi.
- **ACTION-ATTACH** (Rule 3) — shot rest par shuru/khatam nahi hota.
- **ATMOSPHERE NUMBER** (Rule 12) — smoke/fog ka number, andaza nahi.
- **DNA line word-for-word** (Rule 10) — chehra badalna band.

Aur step lock yaad rakho: P2 sirf portrait banata hai. Video prompt P3 se pehle ban hi nahi sakta.

Agar phir bhi mann marzi kare, to ye line bhejo: *"Shot 07 ka STORY LINE kahan hai? Jo line nahi hai wo shot hata do. Video prompt me sirf movement likho — still hi sach hai."*
